Based: Northampton, MA
Full-Time Work History
Company Name: Paradise
Valley Firm Position
Company: Paradise Valley
Firm Job Title: Grant
Writer Location:

Northampton, MA

Description We are looking to add a Grants Writer to our team. The right candidate will be able to generate grants for our clients and track them through the grant process, including proposals and appeals. This is a great opportunity for a self-motivated individual who is looking for a creative and fulfilling environment.

Qualified candidates will be

able to handle both the technical and administrative aspects of the grant process. The right candidate will be able to creatively find solutions to clients' problems, as well as effectively manage the grant-seeking process on their own.

Help protect the places we
love, the values we share

Optional Member Code In our emails, sent once or twice a week, you'll receive:

- alerts on new threats to Colorado's environment
- opportunities to join other Coloradans on urgent actions
- updates on the decisions that impact our environment
- resources to help you create a cleaner, greener future

News Release Contact Share this page In January 2020, the Environmental Protection

Agency (EPA) proposed a major rule to require oil and gas extraction operators to disclose the chemical composition of oil and gas they pump and store to federal regulators. Colorado Independent Contractors Association (CICA) strongly opposes the EPA rule. As a diesel/electric generator association representing hundreds of thousands of independent business owners, we believe

the proposed rule would compel Colorado businesses to disclose sensitive chemical information, including proprietary data on fuel composition, performance data, and location data, to a federal agency for use by the agency at a time when Colorado's leaders are actively trying to modernize our state's economy and provide greater access to capital for energy jobs and

renewable energy
technologies. The proposed
rule would impose
significant compliance costs
on our business

Free Casio FX 95.1. Field
of the Invention The present
invention relates to a cable
assembly, and more
particularly to a cable
assembly for a Universal
Serial Bus (USB) connector.

2. Description of Related
Art A cable assembly for a
USB connector in
accordance with the prior
art usually comprises an
insulative housing, a

plurality of contacts received in the housing and a shell mounted on the housing. The contacts have a pair of engaging portions and a tail portion soldered to a PCB (printed circuit board). The shell has an opening surrounding the contacts. However, the contacts are generally made of metallic materials, such as aluminum. When the cable assembly is subjected to an external force, the tail

portions of the contacts may bend to facilitate the contacts being disengaged from the PCB. As a result, the reliability of electrical connection between the PCB and the contacts is affected. Hence, an improved cable assembly is desired to overcome the above problems.

Q: Why the values of input and select are overwritten when passed as data to the backend? I have a json list of input

values and select values like this: \$options = []; \$inputs = []; \$selects = [];
foreach(\$rows as \$row){
 \$options[\$row['id']] = \$row['options'];
 \$inputs[\$row['id']] = \$row['inputs'];
 \$selects[\$row['id']] = \$row['selects']; } I am using
AJAX to make a post request to the backend with the input and select values.
When I submit my form to the 3e33713323
