Big ant kerala In the middle of a forest on the outskirts of Kochi, a small hill rises with all the pomp and panache of a tourist attraction. Nalloor, in Munnar, is a place that gives you a glimpse of Kerala's past. There are many things to do in Nalloor, the fourth highest mountain in Kerala. But why not make your trip to Nalloor a historical one by visiting the 'Kochi Kappakadavu Kondu,' a sprawling piece of ruins? It was a secret bunker built by the erstwhile rulers of Kochi in the 17th century and it had a unique design. It was built around an island, but was flooded by the sea in the 18th century. There are two main things that you can do here. You can climb a hill (the altitude of which is unverified by us) and see how the Kochi rulers used to live. Or you can cross the small river to get to the opposite side of the hill, which will lead you to a small temple. There is a jeep from Nalloor to Pulpally that is being run by a private company. However, if you do have your own transport you can hire a private vehicle or jeep for a reasonable price. If you are in Kerala in the middle of October, the State government is organising a festival where all the people come to the Kochi Kappakadavu Kondu. The festival lasts for four days
