The program used the EcoDesign Object database. The design process used at the time was the formalized 4D process, a "4-D" approach to architecture in which the dimensions of the building are included in the design. Autodesk Building Design Suite is a continuation of Autodesk EcoDesign, and is designed to assist in the early phases of architectural design. It is sold by Autodesk, as opposed to the aforementioned BDS. It is available in both an architectural and an interior design version.
